Networks & critical applications - Industrial Environments

The E4 VALUE range is equipped with microprocessor controlled On Line Double Conversion technology and delivers a perfect sinewave output current for lower-budget critical applications.

Value

From 1 to 10kVA

An advanced technology

Equipped with the **On Line Double Conversion controlled by microprocessor**, E4 VALUE range delivers **perfect sinewave output current** and provides thorough and effective protection of critical devices.

Low budget and reliable solution for critical applications

A Smart features adapted to all situations

Equipped with smart features (control by microprocessor, Energy saving ECO mode or cold start function), E4 Value range offer **RS 232 and/or USB** communication ports enable UPS to communicate with the various stations and IT servers it is protecting.

An **intuitive display** (LED for models from 1000 to 3000VA and LCD for models from 4000VA to 10k VA) shows the UPS status : ON/OFF, operating mode configuration, voltage setting, programmable outlet setting...

ADAQUATE SOLUTIONS FOR ALL SITUATIONS

Smart features

- Optimal output power factor : up to 0,9 for models E4 VALUE + 6000 and 10 kVA

Energy saving ECO mode : it allows energy and cost savings. In addition, a static bypass power supply via the UPS prevents from power cuts in case of overload or other external incident.

Backup time : up to 30 minutes for the protection of one server and 2 computers for example, depending on the connected load.

Cold start function

- Models 6/10 kVA : Manual Maintenance Bypass

- Included with static bypass for **E4 VALUE + 6000 and 10 kVA models**
- Uninterrupted supply** of connected equipment during maintenance on the UPS thanks to a rotary switch
- Guarantee of **personnel safety without interruption of service**

Easy of use and communication

- Designed for ease of use

An intuitive display shows the UPS status : ON/OFF, operating mode configuration, voltage setting, programmable outlet setting :

- LED display** for E4 VALUE from 1000 to 3000 VA
- LCD display** for E4 VALUE from 4000 to 10 kVA

Energy Saving ECO Mode

Efficiency of up to 95% for the 1 to 3 kVA model reduces energy consumption and costs.

This operating mode delivers a static bypass power supply and returns to Online Double Conversion when necessary.

- Communication

USB and/or RS 232 ports allow communication between the UPS and your various protected IT devices. This is managed using Infopower software :

- RS232 port** for E4 VALUE from 1000 to 3000 VA
- USB et RS 232 ports** for E4 VALUE from 4000 to 10 kVA

CONNECTION

E4 VALUE fom 1000 à 3000 VA

1. Input
2. Input breaker
3. RS 232 communication port
4. Output outlets
5. Output terminal
6. Output breaker

E4 Value 1000

E4 Value 1500/2000

E4 Value 3000

E4 VALUE from 4000 to 10 kVA

1. RS 232 communication port
2. Intelligent slot*
3. USB communication port
4. EPO connector
5. Input circuit breaker
6. Input/Output terminal
7. Maintenance bypass switch

*For the models E4 Value 4000/5000, communication card (USB & RS232) can be replaced by SNMP (optional)

E4 Value 4000/5000 VA

E4 Value + 6000/10 kVA

OPTIONS

SNMP I Pro agent

Using the SNMP I pro agent with the E4 Value UPS devices makes it easier to manage the UPS due to its various special features:

- Connection to the Ethernet network and identification by IP address (random or fixed)
- Setting and programming a system shutdown and restart on a weekly (or other) basis
- Local or remote UPS configuration

SNMP I Pro agent

*For models E4 Value 4000/5000, SNMP I Pro agent shall be inserted at the location of the communication card (USB & RS232).

Minislot SNMP vm Agent for Virtual Network Management

The SNMP vm Minislot agent facilitates network UPS management and virtual environments (vmWare®, Hyper V®, etc.). Associated with RCCMD appliance, it makes it possible to control the starting and stopping of the virtual servers and their associated equipments.

External Maintenance Bypass Switch (BMe)

Provides continuous power to connected equipment during a UPS's maintenance or replacement via a rotary switch (E4 VALUE from 1000 to 3000 VA).
